Annual Report
of the
Stud and Veterinary Department
of
H.E.H. the Nizam's Government
for the year
1341 Fasli
1931-32

HYDERABAD-DECCAN
AT THE GOVERNMENT CENTRAL PRESS
1933

Review on the Administration Report of the Veterinary Department for the year 1341 Fasli.

Captain Nawab Rais Jung Bahadur continued to be in charge of the department throughout the year 1341 Fasli. He toured for 123 days as against 121 of the previous year. The touring of the Deputy Superintendents has been satisfactory. There has also been an improvement in the touring of the staff.

During the year there were 19 scholars under training in different veterinary colleges in British India as against 16 scholars last year. A Deputy Superintendent and a Veterinary Inspector were deputed to Patna for Post-graduate-training during the year.

Number of deaths under this head reported is 22,233 as against 20,520 last year and the number of outbreaks is 476 as against 423 in the year 1340 Fasli. There has been an improvement in this work. Serum Simultaneous Inoculation against Rinderpest was undertaken on a wide scale in Nalgonda, Warangal, and Karimnagar districts for which a special sanction had been granted. 22,093 cattle were protected by this method against rinderpest. 4,069 animals were protected in Aurangabad by the S.S. method against rinderpest and that there should be a demand from Nizamabad district for this method of protection of cattle is encouraging. It is hoped it would be possible to take up this work more extensively in future. 1,44,722 inoculations were performed as compared with 94,304 during the last year. The touring work of the Assistants has improved and the above figures show better attendance at outbreaks which is satisfactory. Government are pleased to note that there has been increased co-operation of officers especially those of the Police and Revenue Departments.

It is gratifying to note that the Hon'ble the Resident has appreciated the help rendered by the department in connection with an outbreak of rinderpest in the Aurangabad Cantonment.

The number of animals treated at the veterinary hospitals and dispensaries and by the touring staff was 2,90,843 as compared with 2,63,484 in 1340 Fasli. The newly constructed veterinary hospital buildings at Gulbarga and Aurangabad were made over by P.W.D. to the department during the year and sites for hospitals at Karimnagar and Osmanabad were acquired.

There has been a reduction in the number of district stallions from 48 to 34 and the policy of horse breeding at the Stud Farm, Hingoli, has been altered to suit the present-day requirements. The number of stands at the end of the year was 21 as compared with 24 in

the year preceding and the coverings were 741 as against 634 in the year before. There is a slight improvement in the number of coverings which is now 20·2 per stallion as against 15·46 in the year before. Government looks forward for further improvement in this direction. The Hingoli Stud Farm continues to function satisfactorily.

Government notes with pleasure the interest evinced by Moulvi Gulam Ghouse Khan Sahib, 1st Taluqdar, Nanded, in connection with improvements effected at Malegaon for the horse and cattle fair.

Government hopes that the issue of the Amrithmahal bulls for the improvement of cattle in the Amrabad Taluka would prove a success and would watch this experiment with interest.

The castrations during the year were 18,611 as compared with 10,672 in the year preceding. Although there has been an increase, much more work is expected. The special attention of the officers of the department should be drawn to the castrations of the scrub bulls.

The thanks of this Government are due to the Imperial Council of Agricultural Research for the appointment of a Veterinary Investigation Officer for these Dominions and looks forward to improve results in disease investigation. Government also acknowledges the help given by the Institutions and Veterinary Departments in British India and Mysore State in the supply of sera and other matters.

Government are pleased to note the names of officers commended by the Director. Government also appreciates the efficient and good services rendered by Nawab Rais Jung Bahadur, the then Director of the department. Further it is gratifying to note that during the year under review the progress in the entire management of the department has been visibly apparent and is satisfactory in every respect.

**Annual Administration Report of the Civil Veterinary
Department, H.E.H. the Nizam's Government,
for the year 1341 Fasli (7th October 1931 to
6th October 1932).**

Administration.

I was in charge of the department throughout the year. I toured for 123 days in eight districts with a mileage of 7,830 by rail and 1,966 by road. I inspected the Stud at Hingoli thrice, 13 subordinate offices, two hospitals and one stallion stand. I attended the Horse and Cattle Show at Malegaon and the Cattle Show at Kandhar in Nanded district. The grass Rumnas at Mominabad were inspected by me to settle the boundary dispute, as a result of which, proposals were submitted to Government for the exchange of Rumnas in dispute with those possessed by the department in former years. During my tour in the Bidar district, I visited Deoni and Udgir with Mr. B.A. Collins, Director-General and Secretary to Government, Department of Commerce and Industry and purchased 38 cows for the Cattle Breeding Depot at Hingoli. The Amrithmahal bulls purchased from the Ajjampur Cattle Breeding Depot, Mysore State, were inspected by me at Mahbubnagar. Serum Simultaneous Inoculation work against Rinderpest was started in the districts of Karimnagar, Warangal and Nalgonda. I inspected the Serum Simultaneous Inoculation camps at Chelpur, Huzurabad, Nacharam, Madira, Raipad and Annaram.

I attended the Horse Show at Delhi and a meeting of the Advisory Board of the Imperial Council of Agricultural Research at Simla. I visited the Imperial Institute of Veterinary Research, Muktesar. I am highly obliged to Mr. F. Ware, the Director of the Institute, for having kindly arranged to show me the work of the various sections of the Institute. I also visited Poona to discuss the question of racing of the Indian-bred horses and subjects pertaining to horse-breeding with Major-General Sir Bernard James, Secretary, National Horse Breeding and Show Society of India and the Western India Turf Club.

Circle Officers.

Mr. Ramchender Mudaliar, Superintendent, was in charge of the Southern Circle throughout the year. He was on tour for 146 days covering 2,097 miles by rail and 2,567 by road. He inspected seven subordinate offices, one hospital and attended the Cattle Shows at Kurvi and Badhrachallam.

He visited 53 villages and treated at headquarters 14 equines, 531 bovines and 12 canines for non-contagious diseases and castrated 7 bovines. Government sanctioned Rs. 50,000 per annum for Serum Simultaneous Inoculation work in the districts of Karimnagar, Warangal and Nalgonda. 22,093 animals were inoculated in these districts by this method. This figure in the very first year of the undertaking of the work is very satisfactory. Mr. Ramchender Mudaliar was mostly engaged during the year

in doing propaganda work and conducted Serum Simultaneous Inoculation work in Mulug and Madina taluqas of the Warangal district. Owing to Serum Simultaneous Inoculation work and ill-health he was not able to tour the required number of days and inspect all the offices, hospitals and touring dispensaries under him.

Mr. Md. Aziz Hasan, Deputy Superintendent, was in charge of the Hyderabad Circle during the year except while he was on leave from 8-4-1341 F. to 30-5-1341 F. He was deputed for six months to the Patna Veterinary College for Post-graduate training from 20th Amerdad 1341 F. During his absence Mr. R. R. Joshi, senior Inspector, officiated for him. Mr. Aziz Hasan spent 101 days on tour travelling 1,264 miles by rail and 1,654 by road. He visited 23 villages, inspected 17 stationary and touring dispensaries, the Government Breeding Bull at Lingal and also the Amruthmahal bulls of the department at the Government Agricultural Farm, Mahbubnagar, attended two outbreaks of contagious diseases, six cattle shows and six cattle markets. He supervised the Serum Simultaneous Inoculation work at the Cattle Breeding and Dairy Farm, Himayatsagar and at the Government Agricultural Farm, Mahbubnagar. A batch of subordinates received training in the Serum Simultaneous Inoculation work under him.

Mr. R. R. Joshi spent 64 days on tour travelling 1,777 miles by rail and 652 by road. He visited 34 villages, the Government Poultry Farm at Pattancheru, the private Poultry Farm at Asafnagar and also the Goshala at Latur which maintains about 500 cattle. He attended five outbreaks, one cattle show, five cattle markets, one cattle fair and inspected 31 stationary and touring dispensaries, two stallion stands, five Veterinary Inspector's offices and the Amruthmahal bulls of the department at Mahbubnagar. He toured in the Udgir taluqa in Bidar district for the purchase of Deoni cows for the Hingoli Cattle Breeding Depot. He attended three meetings of the Municipal Sub-Committee and made a survey of several grazing lands roundabout Hyderabad in connection with the milk problem of the city on which subject he has written a useful pamphlet.

Mr. N. D. Dasan, Officiating Deputy Superintendent, was in charge of the Northern Circle throughout the year. He spent 219 days on tour, travelled 2,410 miles by rail and 3,964 by road in the five districts of his circle. He visited 331 villages, attended 34 outbreaks of contagious diseases. He organised preventive measures to combat epizootic diseases and checked the field work of his subordinates. He attended three cattle and horse shows including the one at Malegaon. He inspected 16 touring dispensaries, three hospitals and twelve stallion stands, some of which were inspected twice during the year.

He carried out 4,069 inoculations by Serum Simultaneous method of inoculation including cattle belonging to the residents of the Aurangabad Cantonment and the bullocks owned by the Cantonment Authorities when rinderpest broke out in the Canton-

ment limits. It is gratifying to note that the Hon'ble the Resident was pleased to bring to the notice of the department the good work done in the Cantonment.

Bullocks of the Government Agricultural Experimental Farm at Paibham were also immunised against rinderpest by serum simultaneous method of inoculation. There were 24 camps for serum simultaneous inoculation work in this circle, at which most of the subordinates of the circle received training in the technique of serum simultaneous method with the result that all the Veterinary Inspectors of this circle and some of the Assistants are now capable of undertaking this work independently.

Mr. A. S. V. Mudaliar, Deputy Superintendent, continued to be in charge of the Stud Farm, Hingoli.

Mr. B. K. Badami was permanently posted and continued to work at the Head Office in connection with the medical store and professional work. He was on duty throughout the year. In addition to work at headquarters, he was on special tours for 58 days covering 3,076 miles by rail and 814 by road. He went to Ajjampur in Mysore State for the selection and purchase of the Amruthmahal Breeding bulls required by the department. He visited the Hingoli Stud with me thrice during the year and accompanied me to conduct the Horse and Cattle Show at Malegaon and the Cattle Show at Khandar. He also toured with me for the selection and purchase of the Deoni cows required for the Cattle Breeding Depot at Hingoli. He inspected the Amruthmahal Breeding Bulls stationed at the Experimental Agricultural Farm, Mahbubnagar. He visited Pocharam in the Nizamabad district for the investigation of liver fluke disease.

Education and Training.

During the year under report Government sanctioned four departmental scholarships, two scholars were deputed for training to the Patna Veterinary College and two to the Bombay Veterinary College. Details of State Scholars under training at the end of the year are shown below:—

Royal Veterinary College, London	..	1
Veterinary College, Lahore	..	1
Do. Patna	..	8
Do. Calcutta	..	1
Do. Madras	..	5
Do. Bombay	..	3
		<hr/>
		19
		<hr/>

One Deputy Superintendent and one Veterinary Inspector were deputed during the year for six months to the Patna Veterinary College for Post-graduate training.

Contagious Diseases.

Table II.—22,233 deaths from contagious diseases were reported during the year as against 20,520 in 1340 F. as noted below:—

Equines			1340 F.	1341 F.
1. Glanders	1
2. Surra	6
3. Other contagious diseases	6	6
			<hr/> 6	<hr/> 13
			<hr/>	<hr/>
Bovines				
1. Rinderpest	18,853	20,348
2. Foot and mouth	64	49
3. Hæmorrhagic septicæmia	680	1,252
4. Black quarter	189	380
5. Anthrax	234	140
6. Other contagious diseases	20	26
			<hr/> 20,040	<hr/> 22,195
			<hr/>	<hr/>
Others				
1. Rinderpest	13	7
2. Foot and mouth	6
3. Other contagious diseases	461	12
			<hr/> 474	<hr/> 25
			<hr/>	<hr/>

The number of outbreaks during the year was 476 as against 423 in 1340 F.

As usual the districts that suffered most from cattle diseases were Nalgonda, Warangal, Nizamabad and Mahbubnagar. Karimnagar, Aurangabad, Bir and Medak come next in order. The wave of Rinderpest was still on the rise during the year and the large numbers of preventive inoculations carried on can be said to have checked the disease to some extent. Hæmorrhagic Septicæmia broke out in Karimnagar district. The other diseases are not of much importance.

To cope with the outbreaks the department had to appoint temporarily some touring assistant Veterinary surgeons to vacant posts mainly for contagious disease work. Serum Simultaneous inoculation against Rinderpest was carried on extensively in Warangal, Nalgonda and Karimnagar districts. Similar work was done in Aurangabad district and there was also a demand for this in Nizamabad district. However due to want of funds the work in Aurangabad had to be curtailed and serum simultaneous inoculation work could not be taken up in Nizamabad district. It is gratifying to note the general improvement in the timely reporting of outbreaks of contagious diseases. The

department greatly appreciates the co-operation and help given by officers of other departments particularly by those of the Revenue and the Police. Some officials of the department have reported the effective use of liq. iodine in the early stages of rinderpest. The city of Hyderabad was fairly free from contagious diseases which may be attributed to veterinary inspection at all weekly cattle markets round about Hyderabad.

Table III.—During the year under report 1,44,722 animals were inoculated as compared with 94,304 in 1340 F. The increase in the number of inoculations is due to improvement in the reporting agency and the touring work of the executive staff.

Hospitals and Dispensaries.

Tables IV and V.—The number of animals treated in 1341 F. at veterinary hospitals, dispensaries and by officials on tour was 2,90,843 as compared with 2,63,484 in 1340 F. There was no change in the number of stationary hospitals and dispensaries. The veterinary hospital buildings at Gulbarga and Aurangabad were completed during the year and made over to the department by the Public Works Department. Sites for hospital buildings at Karimnagar and Osmanabad were acquired during the year and it is hoped that these buildings will be ready during the course of the coming year.

Breeding Operations.

Table VI.—The number of stallions at the district stands and the Stud Hingoli was 34 at the close of the year as compared with 48 at the end of the year before. During the year four stallions were sold as unfit for further breeding, one was transferred to the sale list, one was gelded and three handed over to private horse-breeders. Three stallions died and two were destroyed.

Table VII.—The number of stallion stands at the end of the year was 21 as compared with 24 in the year preceding. The number of coverings during the year was 741 as compared with 634 in the year before. The number of stallions at work during the year was 43 as against 41 in 1340 F. The average number of mares covered per stallion was 20·02 as compared with 15·46 in the year before.

Table VIII.—At the close of 1340 F., there were 11 breeding bulls on the register. Ten breeding bulls were purchased during the year from the Ajjampur Cattle Depot, Mysore State, for distribution to breeders in Amrabad taluqa, Mahbubnagar district. One bull was brought on the register from the Hingoli Stud. Three bulls died, two were castrated and one was lost. Thus at the end of the year there were 16 breeding bulls on the register.

Table IV.—During the year under report, 18,611 castrations were performed as compared with 10,672 in the year preceding.

Due to propaganda and simplicity of the operation by the burdizzo castrators, the method of castration by this instrument is becoming popular and it is hoped that the number of castrations will increase year by year. The Remount Scheme was still under the consideration of Government during the year under report.

Table X.—Fifteen horse and cattle shows were held during the year as compared with 13 in the year preceding.

The Malegaon Horse and Cattle Fair, the most important, was also held during the year. The department is grateful to Moulvi Gulam Ghouse Khan Sahib, 1st Taluqdar, Nanded, who is responsible for a number of improvements at Malegaon which greatly helped in making the Fair a success. As in previous years, Mr. B. A. Collins, Director-General and Secretary to Government, Department of Commerce and Industry, kindly attended the Fair and made valuable suggestions for its improvements. Prizes distributed in cash at Shows and Fairs amounted to Rs. 2,338 besides gold and silver medals and bangles.

Table XI.—At the close of the year under report the strength of the cadre of the department stood as below:—

	Sanctioned Posts	Vacancies
Superintendent	1	..
Deputy Superintendents ..	4	..
Veterinary Inspectors ..	16	1
Assistant Vety. Surgeons ..	37	14
Veterinary Assistants, 2nd grade	44	6
Salutry Jamadars	17	1
Salutries	15	1

Expenditure on account of Salutries was transferred from the Local Fund to the State Budget, during the year under report.

Table XII.—**Expenditure**—Figures of the expenditure of the department are ~~not yet available from the Accountant-General.~~

shown in Table No. XII

General Remarks.

The re-organisation scheme of the department submitted to Government at the close of the last year was under revision in the light of suggestions made by the Director-General and Secretary to Government, Department of Commerce and Industry.

During the course of the year the Imperial Council of Agricultural Research sanctioned an annual grant of B.G. Rs. 10,000 for five years for the appointment of an officer to investigate animal diseases in the State. Mr. M. R. Mahajan, M.R.C.V.S. was selected for this post with the approval of the Council and deputed for six months to the Imperial Institute of Veterinary Research, Muktesar, for the necessary training before undertaking the work.

The medical stores worked efficiently during the year. Serum as below was supplied to officials of the department during the year:—

Anti-Rinderpest Serum	2,55,500 doses
Hæmorrhagic Septicæmia Serum	8,900 „
Black Quarter Serum	2,000 „
Black Quarter Aggression	2,300 „

The thanks of the department are due to the Imperial Institute of Veterinary Research, Muktesar, Serum Institute, Mysore, Serum Institute, Madras, for the timely supply of serum, vaccines, virus, etc. The department is also obliged to the Director of the Imperial Institute of Veterinary Research, Muktesar, for his kind help in the examination of pathological specimens, etc.

Major-General Sir Bernard James, Secretary, National Horse-Breeding and Show Society of India, visited Hyderabad during the course of the year for propaganda work regarding Horse Breeding Industry in Southern India. He delivered a very useful and interesting lecture on the subject which was greatly appreciated by the nobility, officials and other important people of Hyderabad.

The following officers carried out their duties in a satisfactory manner and deserve mention:—

1. Mr. Ramchender Mudaliar, Superintendent
2. „ Md. Aziz Hasan, Deputy Superintendent
3. „ A. S. V. Mudaliar, do.
4. „ N. D. Dasan, Offg. do.
5. „ R. R. Joshi, do. do.

The work of the Veterinary Inspectors and other non-gazetted staff was on the whole very satisfactory.

Mr. B. K. Badami, Deputy Superintendent, in my office, has earned my heartiest thanks for the most valuable help he has given me in connection with professional and other matters pertaining to the department.

My personal Assistant was on two months' privilege leave from 16th Thir 1341 F. Mr. Syed Ruknuddin, Head Clerk, officiated for him.

My whole-hearted thanks are also due to my Personal Assistant Mr. Deo Rao Damodar Jatkar for his loyal co-operation and conscientious work.

The work at the Head Office has of late greatly increased owing to the gradual increase in the executive staff of the department and the extension of its activities in different directions. I am pleased to note that my Head Clerk Mr. Syed Ruknuddin and the office staff have worked hard and loyally throughout the year.

(Sd.) RAIS JUNG,

Director,

Civil Veterinary Department.

Stud and Fodder Farm, Hingoli.

The rainfall during the year was 41 inches 26 cents as against 46 inches and 33 cents in the year preceding. The seasonal conditions were not very favourable owing to heavy rains.

Cash receipts for the year amounted to Rs. 10,936 as compared with Rs. 9,860-3-7 in 1340 Fasli.

The following are some of the diseases which occurred on the Farm:—Worms, Gastro-enteritis, Opacity of Cornea, Rinderpest, Foot and Mouth, Diarrhoea, Catarrh, Melonotic Tumour, Biliary fever, Orchitis, Quittor, Sanderack, Cancer of horn, Retention of Placenta.

One mare died from rupture of intestines and one colt from effects of fracture. There were deaths among cattle from Gastro-enteritis, Foot and Mouth and Rinderpest. One Bikaner sheep died from Cascoous lymphocytosis.

The yield of fodder during the year was 25,41,700 pounds of hay and 12,145 pounds of Kadbi. The large decrease in the yield of Kadbi is due to the adverse effect of untimely and heavy rains and jawar and other crops suffered. In view of the poor harvest and economic depression the Kadbi available was distributed amongst the Battaidars of the Esapur and Bijaram Farms as a loan to be recovered at the next harvest.

During the year under report the successful coverings were 90·74 per cent. to mares covered or 81·66 per cent. of the total strength of mares. The actual foalings during the year were 29 or 53·70 per cent. Two fillies were drafted as brood mares.

During the year, 38 Deoni cows were purchased for the Cattle Breeding and Dairy Section of the Hingoli Stud. Only pure Deoni herd of cows is now being maintained, the other cross-bred animals have been sold and also the buffalo stock as recommended by the Cattle Breeding Committee.

The total value of grain and fodder crops was Rs. 2,405-10-0 and Rs. 5,960-8-6 as compared with Rs. 3,078-2-11 and Rs. 6,336-12-0 in the year preceding.

The Cattle Breeding Committee appointed by Government met during the year both at Hyderabad and at Hingoli.

Mr. Syed Abdul Jabbar, G.B.V.C., a former veterinary assistant surgeon of this department transferred to the Agricultural Department, was, after receiving training in dairying, taken over by this department and joined duty at the end of the year. He was posted as officer, Cattle Section, Hingoli Stud Farm, for which a scheme was sanctioned by Government last year for the maintenance of 50 Deoni cows.

Mr. A. S. V. Mudaliar, Deputy Superintendent, in charge of the Stud Farm, was on privilege and sick leave from 16th Tir to 19th Shehrewar 1341 F. Mr. C. V. G. Pillai, Veterinary Inspector, officiated for him. Mr. Mudaliar's work as Deputy Superintendent, Stud, was very satisfactory.

The work of the staff at the Stud was satisfactory.

Distinguished Visitors to the Stud Farm, Hingoli, were:—

1. Mr. B. A. Collins, C.I.E., I.C.S., Director-General and Secretary to Government, Department of Commerce and Industry.
2. Major-General Sir Bernard James, Secretary, National Horse Breeding and Show Society of India.
3. Lt.-Col. G. de la. P. Beresford, Chief of the Staff. H.E.H. the Nizam's Regular Forces.
